

FEATHER

All of the furniture in the Feather family has carefully designed details. Examples of this on the chairs are the change in dimensions in the transition between the legs and the back support attachment, and how the radiuses of the back support, seats and legs complement each other.

These make Feather a »silent chair« with character!

The name Feather reflects its elegance and resilience.

The attachment of the back is not merely attractive, it also provides a resilient effect which gives very good seating comfort.

The chairs in the Feather family are versatile and adaptable, and can be used in many different environments, from offices to conference spaces, restaurants and schools. The design is so attractive that it even works in a domestic environment.

The variations available in terms of colour, form and material make it possible to give your interior decoration a personal touch,

Design Jens Fager
