Test Report

Material: Model: Bouroullec Copenhagen table 10/20/30/50/90

Type:	Table	Lab.no.:	493589-3
Materials:	Tabletop: Plywood 20 mm Legs: 40x48 solid oak		

Sampling: The test material was sampled by the client and received at the Danish Technological Institute 29-01-2013.

Method: EN 1729 Furniture – Chairs and tables for educational institutions – Part 1: Functional dimensions. Tested according to table A.1 clauses 1-6.

EN 1729 Furniture – Chairs and tables for educational institutions – Part 2: Safety requirements and test methods. Loading according to EN 1729-2:2012 size 7, (Brown). Clauses 4, 6.

Period: The testing was carried out from 30-01-2013 to 08-02-2013.

Result: Table model Bouroullec Copenhagen table 10/20/30/50/90 fulfils the requirements in EN 1729-1:2006 and fulfils the requirements of Table A.1. Loading according to EN 1729-2:2012 size 7 (brown). Clauses 4, 6.

Individual results appear from Appendices 1 and 2.

Storage: The test material will be destroyed after 1 month, unless otherwise agreed.

Terms: The test has been performed according to the attached conditions, which are according to the guidelines laid down by DANAK (The Danish Accreditation). The testing is only valid for the tested specimen. The test report may only be extracted, if the laboratory has approved the extract.

Software: This report was generated by software version 2.10 of 2011-03-07.

08-02-2013, Danish Technological Institute, Wood Technology, Taastrup

Lab. No.: 493589-3**

EN 1729-1:2006 – Table A.2

Size code	0	1	2	3	4	5	6	7
Colour code	White	Orange	Violet	Yellow	Red	Green	Blue	Brown
1. Length of the lower leg (without shoes)	200-250	250-280	280-315	315-355	355-405	405-435	435-485	485+
2. Person height (without shoes)	800-950	930-1160	1080-1210	1190-1420	1330-1590	1460-1765	1590-1880	1740-2070
3. H ₁ -Height ± 10 mm	400	460	530	590	640	710	760	820
Measured						745		
4. T ₁ -Min. table top depth	500 ¹	500 ¹	500 ¹	500 ¹	500	500	500	500
Measured								650
5. Min. table top length per person	600 ²	600 ²	600 ²	600 ²	600	600	600	600
Measured								1300
6. Min. horizontal distance between legs (per person)	500 ³	500 ³	500 ³	500 ³	500	500	500	500
Measured								1095
1. Can be reduced to 400 mm (only if required due educational conditions) 2. Can be reduced to 550 mm (only if required due to educational conditions) 3. Can be reduced to 450 mm (only if required due to educational conditions)

The general conditions pertaining to assignments accepted by Danish Technological Institute shall apply in full to the technical testing and calibration at Danish Technological Institute and to the completion of test reports and calibration certificates within the relevant field.

Danish Accreditation (DANAK)

DANAK was established in 1991 in pursuance of the Danish Act No. 394 of 13 June 1990 on the promotion of Trade and Industry.

The requirements to be met by accredited laboratories are laid down in the "Danish Agency for Trade and Industry's ("Erhvervsfremme Styrelsens") Statutory Order on accreditation of laboratories to perform testing etc. and GLP inspection. The statutory order refers to other documents, where the criteria for accreditation are specified further.

The standards DS/EN ISO/IEC 17025 "General requirements for the competence of testing and calibration laboratories" and DS/EN 45002 "General criteria for the assessment of testing laboratories" describe fundamental criteria for accreditation. DANAK uses guidance documents to clarify the requirements in the standards, where this is considered to be necessary. These will mainly be drawn up by the "European co-operation of Accreditation (EA)" or the "International Laboratory Accreditation Co-operation (ILAC)" with the purpose of obtaining uniform criteria for accreditation. In addition, DANAK draws up Technical Regulations with specific requirements for accreditation that are not contained in the standards.

In order for a laboratory to be accredited it is, among other things, required:

- that the laboratory and its personnel are not subject to any commercial, financial or other pressures, which might influence their technical judgement

- that the laboratory operates a documented quality system
- that the laboratory has at its disposal all items of equipment, facilities and premises required for correct performance of the service that it is accredited to perform
- that the laboratory management and personnel have technical competence and practical experience in performing the service that they are accredited to perform
- that the laboratory has procedures for traceability and uncertainty calculations
- that accredited testing or calibration is performed in accordance with fully validated and documented methods
- that the laboratory keeps records, which contain sufficient information to permit repetition of the accredited test or calibration
- that the laboratory is subject to surveillance by DANAK on a regular basis
- that the laboratory shall take out an insurance, which covers liability in connection with the performance of accredited services

Reports carrying DANAK's logo are used, when reporting accredited services and show that these have been performed in accordance with the rules for accreditation.
